Preliminary 2

MIR 2013 Barcelona

Dear Colleagues,

Welcome to the Annual Scientific Meeting of MIR (Management in Radiology). MIR is a subcommittee of the European Society of Radiology (ESR) focused on all aspects of management in today's radiology fields.

The conference will take place in Barcelona (Spain) and will last two full days from Thursday, October 10 and 11. It will appeal not only to radiologists, but to physicians and other physicians in different medical disciplines, as well as to radiographers/technologists, managers, nurses, informatics personnel and members of vendors.

The MIR programme is varied, interesting and highly dedicated to actual challenges of healthcare. There will be sessions on **Appropriateness and Decision Support, Quality Issues, eHealth and Teleradiology, Communication, Leadership, Innovation Management**, and last but not least **Management issues in Education and Research** (Knowledge repositories and Analytics).

Also, there is an opportunity to submit abstracts for poster presentations to enhance the participation of knowledgeable researchers in the field of MIR. The best papers will be presented in a special poster session to give the best audience to the authors.

There will be a joined **Postgraduate Course on Management** for young radiologists together with the main conference. The Course will take place on **Wednesday, October 9**. Dedicated topics and highly renowned experts will give a special character to this workshop. The combination with the MIR main conference will be an extraordinary opportunity for young radiologists to learn about these management topics and to meet leaders in radiology from throughout Europe and North America.

MIR prides itself to offer an open and informal atmosphere at its congresses enhanced by interesting social events.

I look forward to see you in Barcelona.

Sincerely yours,

Peter Mildenberger

Chairman of MIR Subcommittee
