30th

سی امین کنگره  
رادیولوژی ایران  
Iranian  
Congress of  
Radiology

هتل المپیک تهران  
۲۲-۲۶ اردیبهشت ۱۳۹۳  
13 - 16 May 2014  
Olympic Hotel Tehran - Iran

**Dear Colleague,**

The 30th Iranian Congress of Radiology is to be held at Tehran Olympic Hotel, Iran, on May 13–16, 2014.

The 30th ICR features an oncologic imaging and onco-intervention course, by prominent lecturers from west Europe and North America. This course will be provided in English language and is arrange in four days program all through the congress.

Attached to this email, the flyer and program of this course is emailed to you to supply further details.

I appreciate if you kindly announce this course in your society to encourage your members to participate if interested.

Best Regards

**Hamidreza Haghhighatkah, M.D.**

President of Iranian Congress of Radiology

## List of Lectures:

*Dr. Ali Shirkhoda*

- Oncologic Pitfalls in Imaging of the Pancreas
- Imaging of Pancreatic Neuroendocrine Tumors
- Oncologic Pitfalls in Imaging of the GU Tract
- Indeterminate Adrenal Mass in Patients with Cancer
- Imaging of the Peritoneum

*Dr. Bijan Bijan*

- Hybrid imaging of pancreatic cancer
- Hybrid Imaging in Colorectal Cancer
- Hybrid Imaging of GIST
- Hybrid Imaging: Esophagus (Esophageal) Cancer Imaging

*Prof. Jafar Golzarian*

- Drug Eluting Particles for Embolization: What Do You Need to Know?
- Radio Embolization with Y<sub>90</sub>: How to Get Started and Technique  
Treatment of Hepatocellular Carcinoma: Drug Eluting Vs. Classical Transarterial Chemoembolization (TACE)
- TACE for HCC: Choice of Embolic Materials
- Radioembolization with Y<sub>90</sub> for HCC and Colorectal Metastases to the Liver: Results and Complications
- Embolization of Bone Metastases Prior to Surgery
- Embolization of Lower Urinary Tract Symptoms Due to BPH (an Update on the State of the Art)

*Dr. Daniele Regge*

- CT-Colonography (Colorectal Cancer Diagnosis & Staging)
- Small Renal Masses
- Imaging of Cholangiocarcinoma
- Imaging of Prostate Cancer
- Ovarian Tumors: Diagnosis and Staging

*Prof. Heinz-Peter Schlemmer*

- Principles of Oncologic Imaging & Reporting
- Assessment of Treatment Response: Current Criteria and their Limitations (Resist & Persist)
- Liver Lesions: Practical, Differential Diagnostic Approach & Pitfalls
- Imaging Tumor Response to Therapy in the Era of Target Therapy

*Prof. Andrea Laghi*

- Imaging of Pancreatic Adenocarcinoma
- Cystic pancreatic neoplasm
- Imaging of Gastrointestinal Stromal Tumors
- Initial Staging of Rectal Cancer
- Basis of DW Imaging of Oncologic Imaging

*Prof. Luigi Solbiati*

- Percutaneous Ablation of HCC: Indications, Long Term Results and Complications
- Thermal Ablation of Liver Metastases from Colorectal Cancer: 10-yr Follow- up
- Percutaneous Ablation of Kidney Cancer
- Comparison of Radiofrequency vs. Microwaves Ablation for Liver Malignancies
- When Aspiration Biopsy of Thyroid Nodules is Really Needed
- Virtual Navigation with Real-Time US/CT/MRI/PET Fusion Systems to Guide and Monitor Ablations
- Follow-up of Percutaneous Ablative Treatments with US Contrast Agents
